Folks:

Doug from Deans Tank called on Friday, February 20<sup>th</sup> to inform me that based on the sampling results of the tank contents, the City of Onamia will not be accepting the contaminated water into their wastewater facility. As a result, the tank removal will be postponed until April or May when frost is out of the ground. Doug and I talked this morning and the owner still plans on having the tanks removed but did not have the funds at this time to complete the work due to added costs with cold weather and disposal of contaminated water from the tanks.

Doug will also be forwarding me the tank contents results and I will forward them on to appropriate staff.

If additional questions come up , please feel free to contact Doug at Dean's tank or myself here in the Brainerd Office.

Thank You,

Stan
